

Jake & the Convolution

Jake & the Convolution stand for emotionally charged alternative rock with depth, cinematic richness, and powerful guitars. Founded by singer and producer Jake, the band has supported acts like Rea Garvey and Roger Hodgson, performed at major festivals such as RPR1 Open Air and Schlossgrabenfest, and released the album Black Reflection, which features an international sound. In 2025, the project made a comeback with new songs and renewed energy — uncompromising, reflective, and stage-ready. In 2026, the band released three new singles that deliver a powerful statement, exploring emotional, social, and deeply personal themes with honesty, intensity, and a distinctive sound.
